

# BIO tape 1350

Environmentally friendly packaging tape with a total of 87% of bio-based carbon content

## PRODUCT INFORMATION

### Product description

...

LOGO tape GREEN SERIES is a sustainable assortment of our product portfolio. BIO tape 1350 is a universally applicable self-adhesive tape for the closing of shipping cartons. It is produced from environmental friendly materials. Bio tape 1350 does not contain any solvents; the innovative PLA (Polylactid-acid) carrier is biologically degradable and completely compostable as defined in DIN EN 13432:2000-12. Due to the use of innovative sustainable materials, BIO tape 1350 is produced with a total of 87% bio-carbon content and, therefore, a reduced carbon footprint. BIO tape has an official certification issued by DIN Certco.

### Application

...

BIO tape 1350 can be printed to your specific requirements in a sandwich print with up to 6 colors. The printing is located between the film carrier of the tape and the adhesive making it rub-resistant and at the same time offering an exceptional bright colored finish. Our packaging tapes can be used on the most common packaging machines and applicators. Thermal waste processing is possible without any issues. In the paper- and carton regeneration process BIO tape 1350 can be sorted out very simple.

### Storage conditions

...

Dry storage, avoid direct sunlight  
Storage temperature +15 to +25 °C  
Shelf life up to 6 months after delivery

### Dimensions

...

Lengths	66,660 m
Widths	50 mm
Other dimensions on request	

### Technical data

...

Backing material	PLA (Polylactic acid)
Adhesive	Rubber dispersion / latex
Colors	transparent, white
Total thickness	45 µm
Adhesion to steel	4 N / cm
Reißkraft	33 N / cm
Reißdehnung	170%
