

LOGO tape 11342 Fingerlift

Resealable tape with integrated lateral fingerlift

PRODUCT INFORMATION

Product description

LOGO tape 11342 Fingerlift consists of a stable MOPP carrier with low elongation and a natural rubber adhesive. The tape includes a non-adhesive zone (fingerlift) for easy peeling and resealing of a package.

Application

LOGO tape 11342 Fingerlift allows boxes and cardboard packaging to be opened without the use of any cutting tools. LOGO tape 11342 Fingerlift is suitable for manual or automatic application. You have chosen the right product with LOGO tape 11342 Fingerlift for applications involving resealable packaging, for example, for tobacco, paper tissues, pasta, bread, coffee, etc.

Storage conditions

Store in a dry place, protected from direct sunlight.
Storage temperature: +15 to +25°C
